

CBF Parent Teacher Scheduling Software Integration with CIMS

Downloading Information to CBF

CIMS can download all of the student demographic data needed for CBF in an appropriate format so that none of this information has to be re-keyed. In CBF, you must setup the teachers - but CIMS will provide the students.

Process:

- Run STU.905 to generate a file SMSTRANS/pstu095x(clientxxx)
- Transfer the file from the iSeries to your PC
- In CBF Software choose to import the file

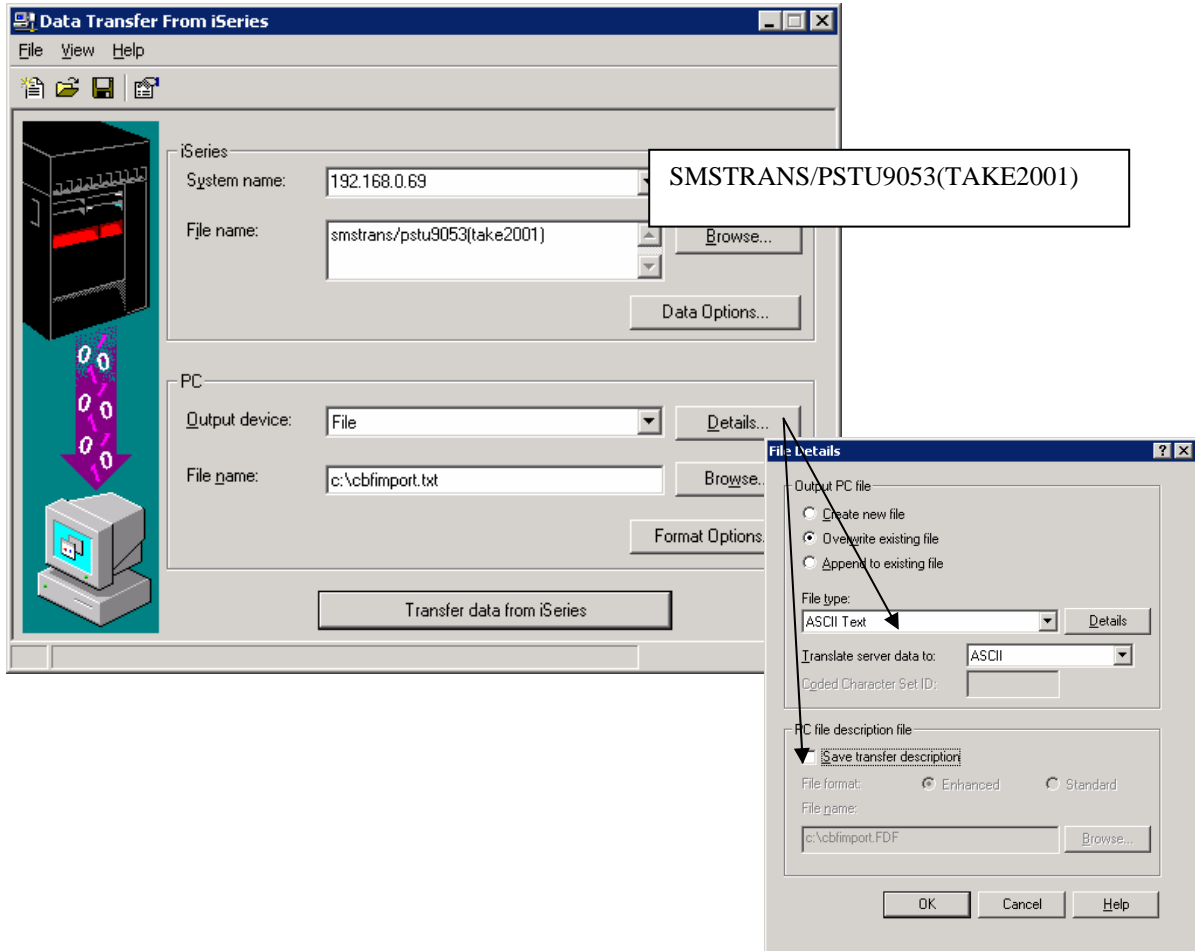

- Year Line: Current year information or next year(year start orientation session setup in April) can be selected
- Member: Includes the customer ID (SEVEN,MLAKE,SD83_..) plus school ID
- File option: This is very important. The newer versions of CBF allow for more information to download. Make sure to select the file option that describes what version of CBF you have. If you have a newer version - you will want the newer file!
- Term(s) or Homeroom Teacher: Course oriented schools that wish to do interviews per teacher need to have CBF version 6.0 or higher and should select which term they are downloading. If you are only setting up homeroom interviews with a single teacher then select homeroom teacher option.

Once this option has been run, a file with name as indicated on the screen is created and is ready for download. No report is generated.

The file formats differ between versions /PSTU9051 or 2 or 3. The older version did not contain separate guardian fields. For Version 2 and 3 the format is:

- Guardian1 Family Surname
- Guardian1 First Name
- Guardian 2 Full Name (eg: Sam Smith)
- Home Phone#
- Student Name
- Teacher Full Name 1 thru 15 (Version 3 Only)

The next step is to transfer this information from the iSeries to your PC so that you can import it into CBF.

The final step is to go into the CBF Software and to select to import from your newly created PC File (In the sample above c:\cbfimport.txt). Refer to CBF for instructions on how to accomplish this.

Importing CBF Interview information back to CIMS

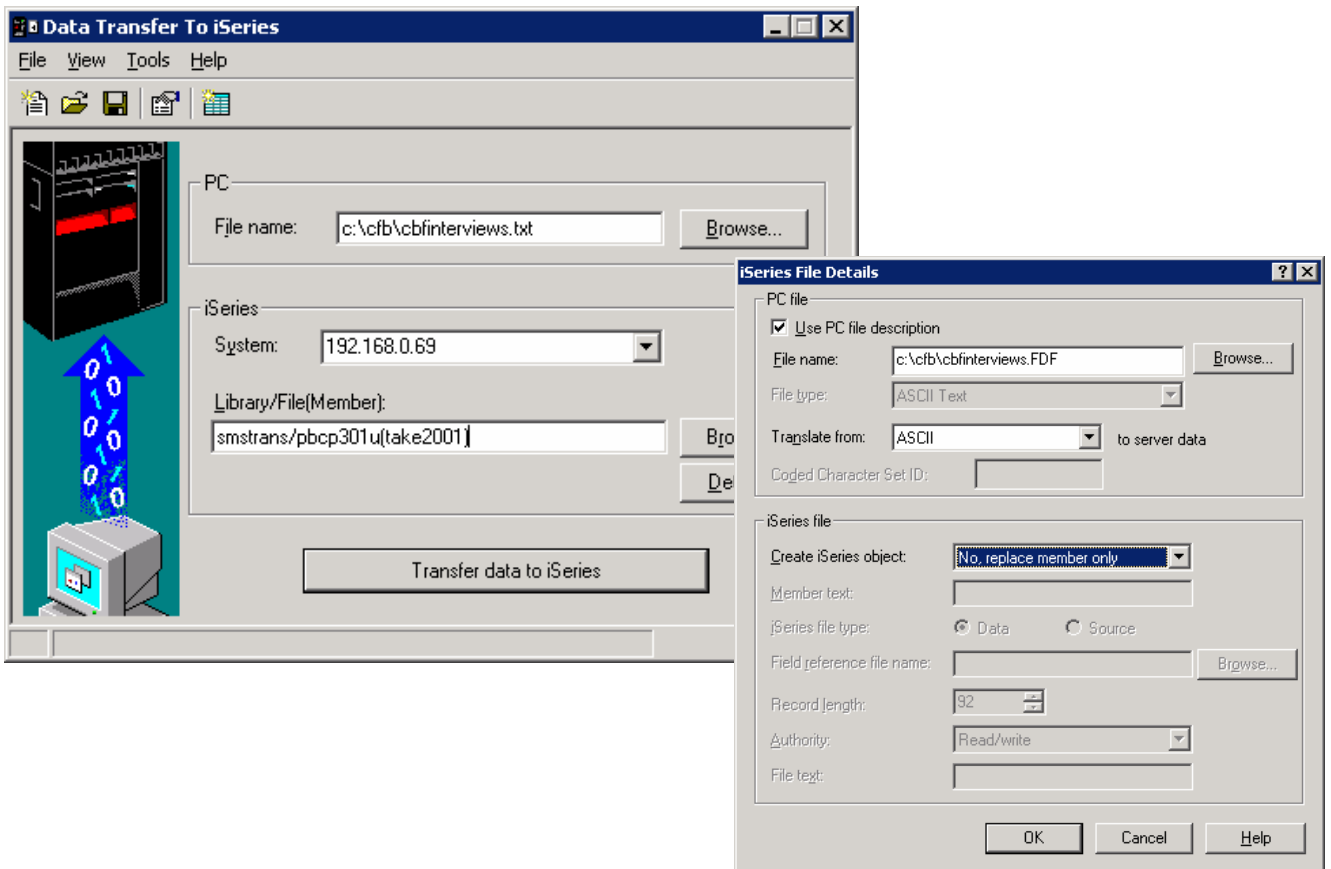

CBF can create an export file for CIMS with all of the resulting interview date/times so that interview information can be viewed in Parent Connect. There is no CIMS option to report on the information (we are expecting this to occur from CBF)

Process:

- Run export function in CBF to create a PC File
- Transfer file from PC to iSeries (.fdf file is required)
- In CIMS run option CBF.301 to import the information from the temp file (SMSTRANS/PCBF301U(member) to live environment. Existing information for the school is cleared before new dates are loaded

Refer to instructions from CBF on how to create an export file and pay attention to the name and location of the file so that you can find it to export to CIMS. This will be a fixed field text file containing the following fields. There may be more than one record per child (if there are multiple interviews). No information is updated in CIMS other than the interview details.

- Guardian1 Surname (Key)
- Guardian1 First Name
- Home Phone# (Key)
- Student First Name (Key)
- Teacher
- Room
- Interview Date
- Interview Begin Time
- Interview End Time

In the File Upload, a matching .fdf file must exist in order for the upload to work. Contact your I/T department to ensure this extension file is available to you. Notice by pressing <details> you can confirm that you have the field description file (.fdf).

If it is your first ever upload then you need to <replace member only> option with the <create member>. Careful you do not want the option to create file and member!

Once the data has transferred from your PC to the iSeries. Your last item is to run CIMS option CBF.301. This option clears all old/existing interview information for your school and reloads based on the new interview information just transferred.

A report is produced identifying all records that were loaded as well as any with errors.

Once all of the interview information has been loaded using CBF.301, an interview tab is available from Parent Connect that allows the parent to see/print their interview Schedule.

The screenshot shows a web browser window titled "CIMS Parent Connect - Student Information - Microsoft Internet Explorer". The address bar shows the URL: http://192.168.0.30/schoolconnect_app/ParentInfo1.aspx. The page features a navigation menu with tabs: Basic, Attendance, Assignments, Schedule, Grades, Interviews, Fees, PickCourse, SendMsg, Calendar, PassWord, Reports, and Logout. The "Interviews" tab is selected.

Below the navigation menu, there is a search area for "Student(s)" with the value "1. ELAINE AFINOGENOV" selected. To the right of the search area are "ReFresh", "Grade" (11), and "Class" (11) buttons.

The main content area displays a table with two columns: "Begin Time" and "End Time" on the left, and "Teacher", "Room", and "Date" on the right. The table contains the following data:

Begin Time	End Time	Teacher	Room	Date
08:45 am	09:00 am	D. SEMELOV	RM106	June 1, 2
04:45 pm	05:45 pm	K. PARR	#123	June 2, 2

The browser's status bar at the bottom shows "Internet" and a JavaScript error: "javascript: __doPostBack('AA9', '')".
