CIMS 2012 has something for everyone. It is an integral part of our CIMS year. Your opinion matters and the way that you do business needs to be shared with others so that we can all gain perspective and insight.

There are limited opportunities to spend quality learning time for CIMS. Conference creates this opportunity.

If you attend this conference we guarantee you will go home and implement new things that will have significant impact to your school or district.

A complete agenda will be available in late January expecting the majority of registrations to occur before the end of February.
