

## 2012 - Web Enhancements Parent Connect & Teacher Connect

(Use PTF201108websms for previous year)

(December 16th – January 24)

(January 25<sup>th</sup> – March 15<sup>th</sup>) \*\* Repost May 1

### Parent Connect and Student Connect

- January 24: SIGNIFICANT CHANGE: Student course request entry now allows for a priority sequence for alternate course requests (1,2,3,4) which then displays in the student schedule (SCH.410) and is sequenced for scheduling (SCH.619).
- January 24: New minimum number of courses added to course request selection. This is a warning only because there is nothing we can do to stop them from exiting
- January 24: Minor adjustment to course description view to look better, incorporate more.
- March 15: Great new feature in StudentConnect to be able offer the same completed PCC tag as is available in ParentConnect. The goal here is that if you have had students in and want them to lock these requests in – USE THIS NEW FEATURE to ensure that they don't go home, sign in again .. and change everything! In SCH.441 there is a new Available to Student Connect YNLA .. if you want the new approval select A!

### Teacher Connect

- No Changes

### Student Assignments

- March 15: Student Profile minor enhancement to say REPORT CARD and then print current report card information ... previously just included those marks/comments without clearly identifying them to be related to report card – not assignment module.

### Elementary Report Card

- No Changes

### Corrections

- January 24: Mass return textbook tab error .. resolved.
- January 24: Added the send message to teacher LAST so if you receive the message – you know that all others did send. Also added additional indicators to assist with program no bombing on grammatically incorrect email addresses.
- January 24: On last release additional sort feature was added to student assignment listing. The new sort by Task#/Assign# did not treat the numbers as numeric (10 before 2) .. resolved.

- March 15: Student Connect Schedule “Pick Single date” was showing blank ... corrected
- March 15: Excluded Assignments when viewing in SC/PC were showing with an alternate symbol of ‘F’ ... will now listen to the exclusion and not present any alternate symbol.
- March 15: In sending a very long message and depending on the characters – potentially hacked off a portion of the end of the message only to internal message users (TCH.101) .. corrected.
- March 23: Was an issue with teachers sharing courses and using/posting assignments – resolved so that all assignment attachments are appropriately saved with the teacher who is assigned the course.
- April 19: Custom to SD37 – changed the IEP Central Link to the new product
- May 1: Custom to SD72 – changed to the new IEP Central Link

## **Technical/Admin Notes**

- January 24: Calendar views show a different background color for Sat/Sun to help users more clearly identify weekday versus weekend dates.
