

## Take Two National Conference

---

- **What:** 30+ Sessions – 3 Great Days – 4 Departments – Special Vendor Presentations
- **When:** April 12<sup>th</sup> – April 14<sup>th</sup>, 2023 (arrive April 11<sup>th</sup> last session Noon Friday)
- **Why:** Getting together, collaborating, and problem solving creates GREAT application solutions and a more productive happier workplace
- **Where:** West Edmonton Mall, Edmonton AB – One LOVIN' It Location!

Conference offers an opportunity you CANNOT achieve even if you take advantage of all our other support options (webinars, manuals, online support, visits):

- Develop & re-establish invaluable network connections with alike colleagues; excellent resource to discuss workflow, 'how do you', 'how did that work' kinds of questions!
- Stay up to date with the latest Cims (Core and Connect) changes and updates.
- Have a say on future product direction and feature; we act on change based on the 'YES' at the time of discussion during sessions. Where two or three are gathered this is an excellent voice to make change!
- Work with Take Two on designing and prioritizing new features, new modules, and new epically innovative technology/thinking.
- Learn significant things and discuss, see, and participate in session topics that you would otherwise not talk about (security, district information health checks, workplace accessibility, Connect styling & modernization, people analytics & automation, preparing for business interruption).
- Focus on district administrative workflow; strategize on where improvements could be made.
- Get out of the office and have an opportunity to reset.

New this year we are prioritizing employee and district wellness! Each day there is a day-end session for districts from all departments to talk and compare notes and thoughts for the day with hopes that this extra all-group discussion can lead to great things in returning home. You cannot miss our district 'Mall Challenge'! Each district will be tasked with a super fun series of tasks to perform as a group... no better way to learn more about each other in a fun and slightly competitive setting.

### What staff is best suited to attend Take Two National Conference?

- **Those unsure of Cims Core or Connect.** Spending time in the applications & learning about the data will enhance perspective and help you make better decisions regarding application and workflow.
- **Those that work in Cims and Connect everyday.** There will be many detail sessions for you to participate in to learn and discuss ways to innovate and become more efficient.
- **Those that manage workflow and/or manage administrative tasks.**
- **Those interested in learning more** about administrative process, function, and how Cims and Connect can be used to assist in those functions

Conference sessions are relevant to every level of administration (superintendent, board office management, clerical & all administrative support, department managers, maintenance managers, IT staff). In the past, divisions have also sent/included key school principal or clerical to engage them in the big picture.
